DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "a chassis" in claim 1, the "pin" in claim 4 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 3-5 are objected to because of the following informalities: in claim 3 recites "its main side" in line 2 is not clear, please tell which main side is refer to and in claim 5 recites "it is" in line 3, what is it refer to. Appropriate correction is required.

Claim 4 is objected due to its dependency.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3 and 4 recite the limitation "that receptacles" in line 2 of claim 3, "the pins" in line 2 of claim 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 2 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamada et al. (JP 301270).

With respect to claims 1, 2 and 5, Yamada et al discloses an device for unlocking a compartment of an opening mechanism in particular a thermal printing mechanism consisting of a chassis (Fig.4) a compartment to receive a paper roll (Page 4: [0019]; line 1-3) and being closed by a cover (Fig.2: element 3) and consists of a maneuvering part (Fig.4: top surface of element 38) whereby the lever (element 38) consists of stop (fig.5: a part of element 35 , the protrusion area) able to act together with the sides of the chassis in order to cause the rotation of the cover (3) relative to the chassis when the lever (38) is rotated relative to the cover (3), the maneuvering part (top surface of 38 of the lever (38))is accommodated in a opening (fig.4: element 41) of the cover (3), the

lever (38) consists of a maneuvering part having a shape that is approximately complementary to that the opening (41) of the cover 93) and in that equipped with the extension (element 35), the stop (part of element 35), rotating axes (Page 6: [0033]; line 1-10)

The limitation of the rotating axes intended to come to engage in the receptacles formed in the cover and stops intended to act together with the sides of the chassis does not limit the claim invention due to intended use.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ly T TRAN whose telephone number is 703-308-0752. The examiner can normally be reached on M-F (7:30am-5pm).
